WHAT IS 4PL?

It is a type of logistics service provider that manages and coordinates the entire supply chain of its clients, including other logistics service providers. The 4PL provider also provides complete visibility and control of the supply chain, using advanced technology solutions to track and manage all aspects of logistics operations.

A 4PL provider acts as a single point of contact for its clients, managing relationships with other logistics service providers, and coordinating activities across the supply chain. They may use advanced technologies to optimize supply chain performance, improve visibility and control, and reduce costs..

Concept of 4PL

***END-TO-END
SOLUTIONS***

A 4PL is able to offer additional services of the highest standards including Freight Management and Contract Logistics services, allowing you to benefit from seamlessly designed and customized solutions.

**Single Point
of Contact**

A 4PL provides a single point of contact for all logistics-related activities, reducing complexity, improving visibility, and increasing efficiency across the supply chain.

Decision-Makers

4PL providers typically coordinate with third-party logistics (3PL) providers, managing relationships and services to optimize efficiency and reduce costs.
